

Despite being the leading cause of cancer death worldwide, lung cancer receives far less government research funding than any other cancer.

That's why your support is so crucial.

Every dollar you donate to the ILCF directly supports lung cancer research. Through our Research Awards Program, we fund Fellowships and Young Investigator Awards that support innovative research in lung cancer prevention and translational medicine.

Your gift inspires hope for patients with lung cancer. Hope for new treatments. Hope for improved opportunities. Hope for a better tomorrow.
